

Inverse folding

Given backbone → sequence

Fold sequence; compare to input

128 CATH validation targets

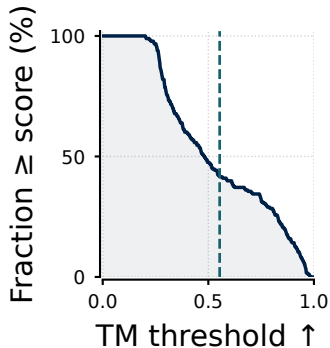

R mean: 0.739

Forward folding

Given sequence → backbone

Compare to native backbone

183 CAMEO targets

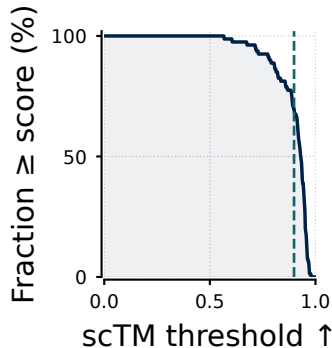

R mean: 0.554

Generated backbones

No observation → backbone

Redesign sequence; fold; compare

80 backbones · PMPNN-1

R mean: 0.899

R: pure entropy · CFG 5 conditional / inactive unconditional · G=50 grid points
